EuDDC 1.st secretary

Re: Application for admission to EuDDC-Federation

Dear Ms Völzer,

First, accept my deepest apology.

From your letter I understand that we should have sent our application for admission to EuDDC-Federation to your address, but we only informed you about the submitted application.

We already sent our application last week on the basis of point 5.1 of article 5 of the EuDDC Constitution to the address of the president of Lithuanian Great Dane Club Mrs Tatjana Biskaševskaja together with the documentation that is required in point 5.2 of the same article as follows:

- 1/ translation of the Slovene Great Dane Club Constitution into English
- 2/ names and contact details of the Chairmanship
- 3/ legal translation of the Club registration certificate into English
- 4/ legal translation of the Slovene Kennel Association certificate of the handed application for membership into English

The certificate mentioned in point 4 will be immediately replaced after the official admission into Slovene Kennel Association, but Breeding Regulations have not been sent because it is not required in point 5.2 of the EuDDC Constitution.

Brief explanations to your questions:

- Vice-President of Slovene Great Dane Club Mrs Tanja Samec-Grad and Mr Damijan Gotlin are members of the Great Dane Section of SKVPM (Slovene Club for Large Breeds and Molossians), which has only few members. Members of the Great Dane Section are invited into Slovene Club, in particular we want incorporate most of trustees and Great Dane fans in Slovenia (the number of Great Danes is at least 500) into Slovene Great Dane Club.

- In Slovenia there is only one registered club for Great Danes, organized in accordance with the Slovene Kennel Association Constitution, as well as the EuDDC Constitution. That is Slovene Great Dane Club.
The Great Dane Section is not a club and has the same status inside SKVPM as more than 30 breeds of II. FCI group.

In hope that I have cleared a few ambiguities, I send kind regards.

Yours sincerely,

Igor Rac
